a
Early adverse feedback (E01)
regret row is the sampling row rescaled
authentic sampling
normalized regret
(same estimand)
final-window mask rate
interval spans zero
−0.05
0.00
0.05
rejected minus accepted
b
Graded disclosure (E02)
rejected stratum only
nonzero disclosure
after rejection
full-authentic
final-window rate
modal arm is the
objective endpoint
normalized regret
(binary minus graded)
−0.25
0.00
0.25
graded minus binary
