A Masking depends on representation
Final-window masking (%)
Flat 2K
Hierarchical
Global mask
Number of contexts K
B Modal selection is a distinct outcome
Good-authentic modal classification (%)
Number of contexts K
C Successful encounter is nearly universal
Learners / actions (%)
Ever accepted in good context
Final-window masking
99.72
84.19
99.64
87.27
Flat 2K
Hierarchical
D Receptive abundance restores selection
Good-authentic modal classification (%)
1 receptive context
4 receptive contexts
75.48
99.36
52.00
95.80
Flat 2K
Hierarchical
E Endpoint success does not remove cost
Expected static regret per step
Number of contexts K
F Larger sets delay successful encounter
Capped first-success step (zero-based)
Number of contexts K
